

EHYDRO IMPLEMENTING A BIS

Prepared by Shanks Gavin

For NOAA's Open House on Nautical Cartography

07 July 2017

"The views, opinions and findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision, unless so designated by other official documentation."

US Army Corps
of Engineers®

TALKING POINTS

- Define eHydro
- Advertise where to access the repository
- Define the authoritative datasets
- Status update of survey details
- Show sample map
- Describe how the BIS is expected to be used
- Expectations moving forward

What is eHydro?

Enterprise Hydrographic Data Repository

EHYDRO

To Catalog, Organize and Disseminate navigation related data efficiently and effectively.

NAVIGATION WEBSITE

The navigation website utilizes web map services hosted by ACE-IT at the CPC.

As the source layers are updated so are the pages, maps, and applications on the site.

USACE Navigation Portal

National Channel Framework

eHydro Composite Survey 2016 (Baltimore Harbor)

eHydro Implementing a BIS 2017

Complete view (NCF & BIS)

EXPECTATIONS

- Complete Proof of Concept on USACE network
- Implement an enterprise version of the BIS
- Expand BIS into web services for public consumption
- Coordinate with other agencies for future uses

THANK YOU!
